OPERATING INSTRUCTIONS

WEIGHING

Step 1: Place the scale on a hard and flat surface. Step 2: Press TARE once, the LED display will show zero.

Step 3: Put food on the platform. Weight will be displayed.

TARE FUNCTION

Step 1: Place a container on the platform. LED display will show the weight of the container.

Step 2: Press TARE to clear the weight of the container – scale will re-set to zero. Place food into the container. LED display will show the weight of the food only. To weigh multiple food items, press TARE between each placement of food into the container.

Step 3: Remove the container and food. LED display will show the negative value of the container. Press and hold TARE again, the platform will show zero after 2 seconds.

HOLD FUNCTION

Step 1: Press and hold MODE for 2 seconds to switch on the HOLD function. LED display will show 'H-ON'.

Step 2: Place food onto the platform. LED display will show the weight of the food. It will beep once and the weight will be locked. The weight will remain displayed when you remove the food from the platform.

Step 3: When a weight has been locked, press TARE to unlock and scale will return to zero.

CARE INSTRUCTIONS

- Place scale on a hard and flat surface to ensure the greatest accuracy.
- Do not drop or subject the scale to shocks as this may damage the unit.
- · Do not use abrasive cleaners.
- Clean the scale with a damp cloth, but do not allow water to enter the scale.
- To protect the life of the scale, keep out of hot or wet environments.
- Remove battery from scale if it has not been used for a long period.
- If scale does not operate, check battery is correctly positioned. Battery may become flat when scale is not used for prolonged periods of time, and may need replacement.
- Do not store the scale in an upright position, always store flat.
- Ensure no water comes in contact with scale.

ERROR INDICATION

Low Power

Overloaded scale – weight exceeds 15k
